National Bureau of Investigation Forensic Laboratory's drug-testing unit's survey Total respondents n=73

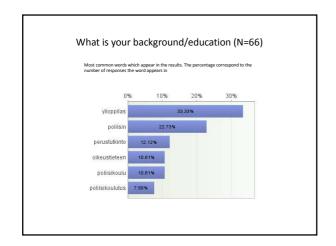

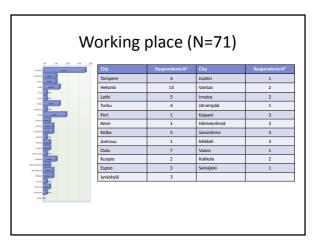

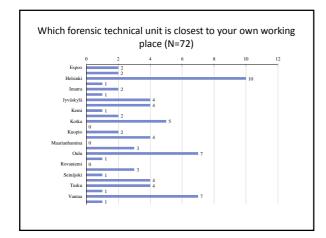

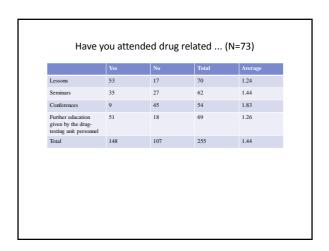

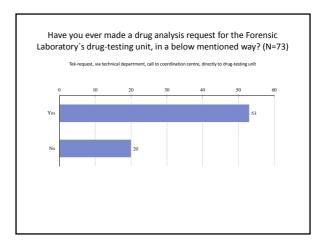

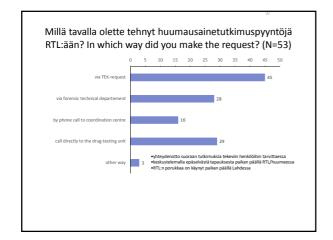

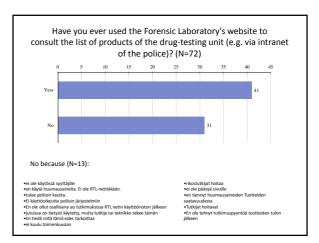

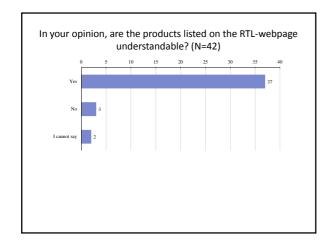

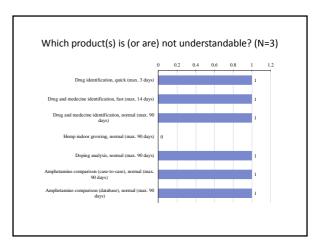

Part I: Questions about the service organisation and products

# What changes do you suggest, to make the products more understandable? (N=3)

•nuo amfetamiinivertailut aiheuttavat usein kysymyksiä teknilikaan
•Näiden lisäksi olisi hyvä olla tuote henkilön verinäytteen huumausainetutkimuksille, joka ei sovi
tyrmäystippauttimukseen tai huumaantuneena ajamiseen, vaan joka on tehty esim. pahoinpitely tai
surmaamiitarkoituksessa
•Joskus olisi tarvetta pilatunnistukselle useammalle näytteelle kuin se on ohjeen mukaan mahdollista. En
muista mila RTL:n ohje sanoo asiasta, yleensä asia holtuu solttamalla...

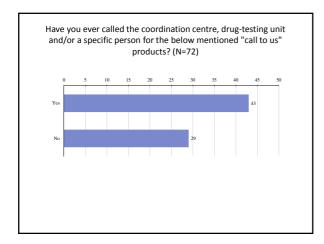

Tilaa itse-tuotteen osalta, kuinka usein pyydätte... When you order by yourself, how often do you ask for... (N=42)

Part IV: Questions about illicit drug profiling

### 30% said no: Distribution according to their actual occupation

- 4 investigators:

   male, 54 years old, 6-10 years of experience, education: Ylioppilas, working in Kajaani, he has taken part to drug related lessons, but not to conferences or further education given by the drug-testing unit personnel and no answer to drug extracted configuration.

- male, 54 years old, 6-10 years on experience, education in an anomaly experience of the drug-testing unit personnel and no anomaly experience places of the drug-testing unit personnel and no anomaly experience places of the drug-testing unit personnel female, 28 years old, 1-5 years of experience, education given by the drug-testing unit personnel female, 26 years old, 1-5 years of experience, education fullish persurvisiting, working in Najands, she has taken part to drug related lessons, but not to seminars, conferences or further education given by the drug-testing unit personnel female, 31 years of, 6-10 years of persperience, education tripogalatusing, by childisoulus, working in Isjands, she has taken part to drug related lessons, but not to seminars, conferences or further education given by the drug-testing unit personnel

1 drug investigator:
male, 28 years old, 1.5 years of experience, education: Poliisin perustutkinto, working in Oulu, he has taken part to drug related lessons, but not to seminars, conferences or further education given by the drug-testing unit personnel (according to his year answers in right be that he is a technical investigator dealing with drugs, because he has answered to part it and il about the product but did not answer about to part It! and part IV (meaning he answered no to the filtering questions), he knows what this drug profiling means.

- 3 chief of investigation:

   female, 37 years old, 1-5 years of experience, education: FT (PhD), working in Kajaani, she has taken part to drug related seminars and further education given by the drug-testing unit personnel, but not to lessons or conferences
   female, 39 years old, 1-5 years of experience, education: polition louduits; Master's degrees, working in Mikield, she has never taken part to drug related sexons, seminars, conferences or further education given by the drug-testing unit personnel (could be a technical investigation chief, CSI according to the answers)
  male, 38 years old, 1-5 years of experience, education: FT(PhD), working in Oudu, be has taken part to drug related lessons, seminars and further education given by the drug-testing unit personnel, no answer to drug related conferences

- 12 technicalinvestigator:

  \*\*male, d) years (d, D-15 years of experience, education; yo, poliisin kokelaskurssi ja miehistökurssi, Runsaasti eri teknilikan kursseja, working in lislaimi, he has taken part to drug related lessons

  \*\*male, 57 years (d, 15 and more years of experience, education: Resikilovula, ulajpäähjastön viriatutkinto, working in Heisinki, he has taken part to drug related lessons and further education given by the drug-testing unit personnel but not to seminars or conferences
- Heldink, he has Laken part to a using reason resolved to the confirmation of confirmation of the confirmat

- personnel male, 50 years old, 15 and more years of experience, education: Pollisin alipäällystötutkinto, working in Vaasa, he has taken part to drug related lessons and further education given by the drug-testing unit personnel but not to seminars or
- conferences
  female, 45 years old, 10-15 years of experience, education: Ylioppilas, merkonomi, polisin perustutkinto ja poliisin
  alpäällyhotukinto, working in Heisinki, she has taken part further education given by the drug-testing unit personnel but
  not to drug dreideld essons, seminars or conferences
  male, 48 years old, 10-15 years of experience, education: Ylioppilas, working in Mikkell, has taken part to drug related
  male, 59 years old, 10-15 years of experience, education: Ylioppilas, working in Mikkell, has taken part to drug related
  male, 50 years old, 15 and more years of experience, education: Polision perusolous, working in Yriax, he has taken
  part to further education given by the drug-testing unit personnel, no answer to drug related lessons, seminars or
  conferences

- part to in time education given by the drug-testing mit personner, no allower to tring related testions, seminate or conferences male, 55 years old, 15 and more years experience, education; yo, alipäällystön virkatutkinto, working in (no answer)/ (nearest technical department Vantaa), he has taken part further education given by the drug-testing unit personnel but not to drug related lessons seminars or conferences

# In your opinion, are the comparison results obtained from the drug-testing unit explicit? (N=45) 0.1 0.2 0.3 0.4 0.5 0.6 0.7 0.8 No 7% (3/45) Yes (N=39) 3 investigators 5 technical investigators 14 drug investigators 10 chief of investigation 7 prosecutors Everyone who has answered to this question should have answered to the next question as well, but only N=31 of 46 have answered to the next question (N=15 have not answered)

# How do you understand the meaning of the comparison's conclusions (similar, linked, inconclusive, different)? (N=31)

Please explain how you interpret the comparison's results conclusi

- Pleose explain how you Interpret the comporison's results conclusions

  The answers are given by 1 investigator, 2 technical investigators, 11 drug investigators, 7 chiefs of investigation
  ukitsten vastauksia juuri siten kuin lausunnossa on sanottu samanlaisine, linkin tims. tarkoittavan, silla vio ila jotain
  näyttöorvot ai oitten ei
  voi esimen vastavan silla vio ila jotain
  näyttöorvot ai oitten ei
  voi esimen vastavan silla vastavan silla voi tarjota, (jotakin) teisea eitä, kuinka suuria valinistuseriä
  veiteinistavan jalla ja jaljon huumausianieaboratoriota on tominnassa (tarkkaa teitea näisitä ei tietenkään voi oila
  olemassakan)
  vei voi varia vaisin selkeitä. Oikeudessa ongelmana on lähimai se, millalaissa eristas eiim, amfetaminia valmistuu samassa erässä.
  Kärjitetysti voidaan väittää vikka, että kaikki Suomen huumausaine tulee yhdestä suuresta valmistuserästä tai ainakin samasta
  laboratoriotsa.

- Lutkintaa.

  Ovat ritikvin selektät, mutta mielestäni nillilä ei ole juurikaan näytöllistä arvo oikeudessa. Enemmän vertailu ohjaa tutkintaa.

  Ovat ritikvin selektä. Täriehä taustatietoja voivat olla esim. kyseisen amfetamiini tms, laboratorion tuotosten levinneisyys adueelliseeti (takavarikor) teleyliä ajalis, mistä voidaan arvioda tavarantoimittajen lukumäärää (mahdollisuutta, että aine olikuma kontinua suuntaavana tietona.

  Tuomiotsumessa merkkystä näyttönä on vain samanlaiset-johtopäätöksellä.

  Illinkki (samanta labarata mahdollisesti) erillaiset (eri labora.

- liekti (samsta labrasta mähdollisesti) erellisest (eri labra) erilisest (erilisest) eril

How do you understand the meaning of the comparison's conclusions (similar, linked, inconclusive, different)? (N=31)

\*\*Please explain how you interpret the comparison's results conclusions

- samanlaiset = sama era links = sama labra era links = sama
